Generator Maintenance Cover

Part No.

Product Description

At Adept Power Solutions we maintain and service a comprehensive range of diesel generators either as standalone systems or in combination with your uninterruptible power supply (UPS). A professionally maintained diesel generator working in harmony with your UPS will provide the ultimate resilience for your mission critical systems.

Installing a generator is an excellent way to protect your mission critical systems. However, it is no guarantee of continual power as generator components can fail if not properly maintained to a high standard. A planned program of diesel generator maintenance should always be considered as an essential part of any standby power protection system.

We offer a standard 4 hour response and also offer additional maintenance options such as remote monitoring or Load bank testing. 24 hour telephone support is provided as standard for all our customers, this dedicated hotline has been created to provide access to our highly trained engineers 24 hours a day, 365 days a year. In the event of a fault, a fully qualified and highly trained engineer will attend site within a specified time period to rectify the problem as quickly as possible.

All Our Industry Leading Generator Maintenance Packages Include:

- 24 hour cover – 365 days a year.
