SDMO Diesel Generators

Part No.

Product Description

Founded in 1966, SDMO Industries is now the 3rd biggest player worldwide in the generating set market. Established in Brest, France, where it is still based, SDMO has three plants extending over more than 31,000 m² excluding logistics.

SDMO designs, manufactures and installs generating sets from 1 to 3300 kVA for its standard range of products, thanks to its high-performance production plant and Research & Development unit. In addition, SDMO puts its engineering expertise into practice by designing tailor-made power plants and offers additional services with high added value: training, after-sales service, spare parts.

Whatever the power needed or the purpose of the generating set, a commitment to quality is guaranteed by an ISO 9001 certification, ensuring on-time delivery and high-performance for all products.

This technological expertise combined with high-tech manufacturing procedures give SDMO the necessary skills to master the design phase of all products, including those intended for sensitive industries.
